On July 10, 2020, the interim rule implementing Section 889(a)(1)(B) of the John S. McCain National Defense Authorization Act for Fiscal Year 2019 (Pub. L. No. 115-232) was released by the U.S. Government’s Federal Acquisition Regulatory Council. Section 889 prohibits the U.S. Government from buying (as of August 2019)—or contracting with an entity that uses (as of August 2020)—telecommunications equipment or services produced by Huawei Technologies Company or ZTE Corporation (or any subsidiary or affiliate of such entities) or, in certain cases, telecommunications or surveillance equipment or services produced by Hytera Communications Corporation, Hangzhou Hikvision Digital Technology Company, or Dahua Technology Company (or any subsidiary or affiliate of those entities). The interim rule addresses the new prohibition on use of the banned telecommunications equipment and services and clarifies the prohibition on buying such equipment that went into effect in 2019. The rule is not limited to end products produced by those companies; it also covers most telecommunications components from those companies that are incorporated into end products. The prohibition and the interim rule for Section 889(a)(1)(B) become effective on August 13, 2020.

For the purposes of this Declaration, “covered telecommunications equipment or services” has the meaning provided in the clause 52.204-25, Prohibition on Contracting for Certain Telecommunications and Video Surveillance Services or Equipment.

1. NK represents that the NK Companies **DO NOT** provide covered telecommunications equipment or services as a part of the Covered NK Products and Services offered to the Government in the performance of any contract, subcontract, or other contractual instrument.
2. NK further represents that the NK Companies **DO NOT USE** covered telecommunications equipment or services, or any equipment, system or service that uses covered telecommunications equipment or services, as part of the covered NK Products and Services.

Information provided herein is based upon reasonable inquiry and NK’s knowledge and belief as of the date this representation. NK has taken and will continue to take reasonable steps to obtain representative and accurate information concerning the telecommunications equipment content of its products.
